*Spring Semester– 15 February 2027– 18 June 2027*

# DURING THE MOBILITY

## *Orientation Days*

The university organizes Orientation Days to welcome international students and introduce them to the campus, all services and support. During these days, students become familiar with their class schedule, the university culture, the semester structure and available support services such as a Psychological Center. We also present friendly places around the campus and the city, useful applications to help settle into student life more easily.

## *Buddy Program*

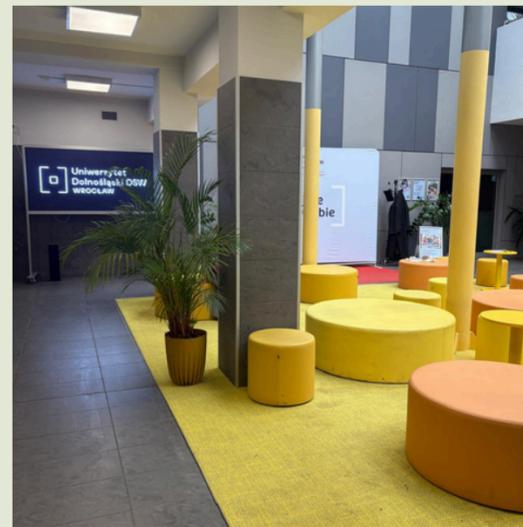

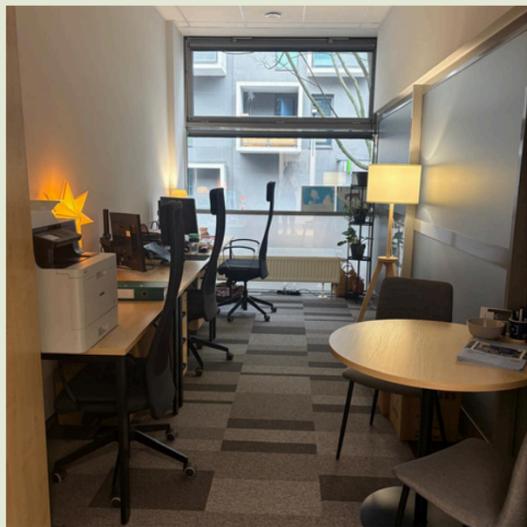

We are launching the Buddy Program, which pairs Erasmus+ student with a local student who will be the first contact person before, at the very beginning and during mobility. The Buddy can assist with transportation, accommodation, and provide insight into Polish culture and customs, show the city, and most importantly - become a first friend during exchange

## *Events & Workshops*

The university offers a variety of events and developmental workshops. We focus personal interests, self-development, and building new skills in a supportive academic environment. The events promote integration and help students adapt smoothly to student life and a new cultural setting.

Student's experience
