Summer School on Industry 4.0

Explore the forefront of industrial innovation with the Summer School on Industry 4.0, a collaborative initiative by three prestigious engineering institutions—CentraleSupélec, Ecole Normale Supérieure Paris-Saclay and Université d'Evry-Val d'Essonne, all founding members of the Université Paris-Saclay. Immerse yourself in the challenges posed by disruptive Industry 4.0 technologies, such as collaborative robots, Operations 4.0, additive manufacturing and automated production lines. Engage in hands-on sessions, stimulate your imagination and collaboratively devise solutions to the evolving landscape of modern industry.
